

Embedded System Based Project Topics:

- School children security system based on RFID and GSM
- Home security System based on LPG gas, Smoke & Fire Sensors
- Automatic Irrigation water pump controller
- Pre-paid Energy Meter with low balance alert
- RFID based Advanced Vehicle parking slot booking system
- Ticket booking system based on RFid
- Highway toll collection using Rfid
- Finger print based employee attendance system
- Finger print based home security system
- Finger Print based Digital Voting Machine
- Bluetooth based advanced wireless home automation system
- Automatic room light controller with visitor counter using IR
- Automatic railway gate control system using ir
- Advanced embedded car parking system using IR
- Visitor counter cum display system using ir
- Intelligent object counting system
- Home automation using DTMF
- Mobile controlled home appliance
- Automatic Street light fault detection and control
- Touch Screen based device control
- Highway speed detector and over speed alert system
- Touch Screen based wireless robot controlling
- Solar panel based battery charger
- LED board with gsm
- Under over voltage control
- Density based traffic light control system using sensor
- Bluetooth based Robot

Note : You can also come with your own project idea if you have any.
