

## Minor Project with microcontroller Based Topics:

- Home automation using DTMF
- Home security System based on LPG gas, Smoke
- Automatic Irrigation water pump controller
- Pre-paid Energy Meter using Bluetooth
- Railway Ticket booking system based on Rfid
- Highway toll collection using Rfid
- Student attendance system using Finger print sensor
- Finger print based home security system
- Bluetooth based home automation system
- Voice Controlled Robot
- Automatic railway gate control system using ir
- Advanced embedded car parking system using IR
- Visitor counter cum display system using ir
- Mobile controlled home appliance
- Smart Street light system
- Highway speed detector and over speed alert system
- Solar panel based sun light trekking
- Density based traffic light control system
- LPG Gas Detector for kitchen
- Bluetooth based Robot
- Line Following Robot
- Water-Level Indicator
- Fastest-finger-first-indicator
- Clap Switch light controlling
- Touch Dimmer light
- Automatic Temperature controlled fan
- House Security System anti-theft

**Note :** You can also come with your own project idea if you have any.
