## Course Content

### Session : 1 Introduction

- Course introduction
- What is microcontroller?
- Introduction to ESP8266
- Introduction to Nodemcu
- Embedded c programming

### Session : 2 Microcontroller Interfacing

- Types of wireless communication
- Types of module
- Nodemcu interfacing with buzzer
- Nodemcu interfacing with led
- Microcontroller interfacing with dtmf
- Microcontroller interfacing with rf
- Microcontroller interfacing with Rfid
- Microcontroller interfacing with bluetooth
- Microcontroller interfacing with GSM

### Session : 3 Artificial Intelligence

- What is artificial intelligence
- What is machine learning
- Understand the theory behind it
- Solve Real World Problems with AI
- Project Session

### Session : 4 Solar Technology

- Solar PV Technology
- Battery storage technology
- Advantages of solar technology
- Use of solar in a small project
- Battery series parallel connection

Note : 2 Days extra doubt clearing Session  
***Advance Project Demonstration***
